O-Insights™
MQTT Plugin

Overview:

The O-Insights MQTT Plugin facilitates seamless data exchange between MOBOTIX HUB VMS, and MQTT Brokers.

With support for MQTT protocol up to version 5, users can publish topics for alarms and events, enabling external systems to subscribe to these topics and create alarms in MOBOTIX HUB.

This integration enhances interoperability, streamlines communication, and improves response efficiency for security events, strengthening the overall functionality of both systems.

Minimum Server Requirements

CPU:
Intel® Core™ i5 or higher

RAM:
8GB or 16GB & more for large systems

Network:
Ethernet 100 Mbit or better

Hard Disk:
10 GB or more free
